To Whom It May Concern:

I would like to say thank you very much for the assistance that I have received from the Low-Income Energy Assistance Program.

I don't get a very big social-security check and obviously the cost of living here in Missoula is high. Without the assistance I don't think I could manage to survive at all.

The winters, as we all know, here in Montana are extremely bitter. The assistance that the State of Montana provides through LIEAP is crucial to the survival of a lot of low-income Montanans. The program also helps me save money to help pay my Medicare premium and supplementary to Medicare insurance premium.

Sincerely,

Juanita E. Mickelson
